SCHEIDEL'S OUDIN RESONATOR

FOR HIGH FREQUENCY
ALTERNATING CURRENT

THE Extensive and increasing demands for the employment of High Frequency for physiological and therapeutic purposes, have prompted us to enter into the construction of the present mentioned apparatus, presented here in illustration.

The practicabilities of the opposite illustrated apparatus have been demonstrated by the most eminent French Physicians (Oudin, D'Arsonval, Rochefort) and others.

The results of demonstration show that the nervous system is affectionated in the most auspicious manner by High Frequency Alternating Currents.

Closed Cabinet.

Adapted for Local and General Treatment.

Prices:
